Additional Context

Please use this section to share any additional information about your family background.

In my family, money was tight, and responsibilities were too many. My first-generation graduate father supported our family and his late brothers'. To help, I began small ventures at 14, earning pocket money and fostering entrepreneurship.

Employer Description

It's a strategy consulting firm that helps purpose-driven organizations with strategic realignment and new initiatives centered on market positioning, organic growth, and customer loyalty by leveraging data science and gamification.

Your Role and Responsibilities

As CEO and Co-Founder of PeopleGamez, I lead strategy, business development, and client deliverables, overseeing strategic pivots and driving international expansion.

Reason For Leaving

I plan to leave the role for an MBA to address skill gaps that became evident while scaling the business, such as managing cross-border operations, brand positioning in diverse markets, and strategic financial oversight.

Key Accomplishments

I led PeopleGamez's transformation, establishing it as a trusted name in game-based strategy consulting. I've delivered organizational turnarounds to 5 ventures in 3 countries and secured invitations to deliver at leading international conferences.

Most Significant Challenge

The toughest moment in my journey was laying off my team after our simulations failed to gain traction. Determined to bounce back, I upskilled by volunteering with business leaders and consulting firms, transforming PeopleGamez into a thriving firm.

Short Answers

Employer Description

A corporate training firm specializing in leadership development and organizational integration through behavioral simulations, focusing on skills like change management, managerial coaching, and conflict resolution.

Your Role and Responsibilities

Co-founded Madiee, scaling the team from 2 to 118 while scaling processes for efficiency. Led game design, hiring strategy, and strategic partnerships to enhance operations and deliver innovative team-building solutions for diverse clients.

Reason For Leaving

Despite sharing the same broader vision, Senthil and I constantly clashed over the organization's direction and pace. We compromised our values to accommodate each other, but realizing the inevitable split, we decided to part ways.

Key Accomplishments

At Madiee, I grew our team from just 2 co-founders to 118 interns and freelancers across 8 departments in a year. To match our growth, I scaled up operational processes and delivered 15+ high-impact leadership programs to diverse organizations.

Most Significant Challenge

With no gamified tools, no team, and no resources in hand, unlocking revenue during pandemic was a challenge when I joined Madiee. We hustled to sustain by convincing clients to bet on prototypes to generate enough revenue to hire our initial team.

Pell Grant Recipient

Have you ever been the subject of disciplinary action at an academic institution (including, but not limited to, violations of academic integrity)?

Extracurricular Activity 1

Organization Mentorship

Role Multiple Roles

Type Other

Start Date 05/2018

End Date Present

Location Bengaluru, Karnataka, India, India

Description

Through OpenTech, Jagriti Yatra, TreeForest Capital, and other engagements, I'm helping 18 founders, most of them being college dropouts, pro bono on strategic dilemmas and entrepreneurial struggles.

Extracurricular Activity 2

Organization Kho Kho

Role Captain, Coach and Player

Type Other

Start Date 05/2008

End Date Present

Location Multiple locations, India

Description

State-level Kho Kho champion, national player, and former school captain. For the last 16 years to this day, starting my mornings with the sport has kept me grounded and focused.

Extracurricular Activity 3

Organization Board Game

Role Facilitator and Volunteer

Type Community

Start Date 12/2022

End Date Present

Location Bangalore, India

Description

As a board game enthusiast, I turned my passion into a community-building initiative by co-organizing bi-monthly sessions, using games to help strangers bond, develop trust, and foster connections.

Award / Recognition 1

Title Youth Icon

Date January 2025

Basis

Transparent, democratic, and merit-based selection process by the Ministry of Youth Affairs, Government of India, recognizing my significant contributions to youth empowerment through my ventures.

Award / Recognition 2

Title Toycathon

Date August 2021

Basis

A 3-stage competition involving game idea submissions, prototype development, and real-time prototype optimizations based on Judges feedback. I led my team at Madiee to win among 129000+ participants.

Award / Recognition 3

Title Startup India Seed Fund

Date March 2023

Basis

4-stage screening focused on innovation, industry relevance, viability of the plan, and business presentation. PeopleGamez was the only startup at our incubator with 36 startups to win the grant.

Essay 1

Business-Minded: Please reflect on how your experiences have influenced your career choices and aspirations and the impact you strive to make on the businesses, organizations, and communities you plan to serve.

Response

Growing up in a small town with limited resources, I witnessed my classmates, despite their potential, couldn't pursue their dreams. My early entrepreneurial stories were no different. These experiences shaped my desire to create solutions at scale that address such barriers and unlock potential.

At the Pi School of AI, I initially focused on delivering technical solutions as part of a globally diverse team. However, navigating cultural differences, shifting priorities, and stakeholder misalignments shifted my perspective. I realized that I can scale impact not just by leveraging technology but by empowering leadership to align stakeholders toward a shared purpose.

During the Jagriti Yatra, an 8,000-kilometer journey with social change-makers, I consulted several social ventures, including a sustainable textile business that empowered rural women and preserved traditional crafts. Despite their potential, the businesses faced strategic inefficiencies in market positioning and customer value proposition. Mentoring these ventures and driving impact, I began to view businesses as powerful tools for uplifting communities and creating lasting impact.

At PeopleGamez, this belief has been central to my work. In one such project, I guided a retail company to uncover cultural stigmas affecting its women-focused product line. By empowering the leadership team, we developed a campaign that involved teachers, priests, and community leaders to address these barriers. This initiative improved hygiene standards for over 25,000 women while also driving significant product growth, showcasing how purpose-driven strategies can create both social and business impact.

My journey has been one of evolution, growing from realizing the need to create solutions, to empowering individuals to drive them, and finally to enabling organizations and leaders to align strategy and purpose for lasting impact. I aspire to build a consulting firm that helps organizations solve challenges, align teams, and foster ecosystems where businesses and communities thrive.

Essay 2

Leadership-Focused: What experiences have shaped who you are, how you invest in others, and what kind of leader you want to become?

Response

In 2016, my 68-year-old grandmother collapsed from exhaustion while returning from the only water pump 8 miles away. Being the only techie in our remote village, I felt responsible and implemented an IoT-enabled irrigation system. Later, my grandfather, emphasizing similar problems faced by villagers, suggested I teach village children to use technology, shifting my perspective from problem-solving to empowering others.

Witnessing the children gain confidence as they developed IoT projects inspired me to launch OpenTech, workshops empowering tribal and slum students with technology to solve local challenges and dream without limitations.

However, challenges emerged:

Colleagues hesitated to volunteer, citing academic pressures.

Students skipped workshops to support their families by working weekends.

When my parents questioned my persistence, I responded, "If I cannot break these barriers, how can I inspire others to?"

My 22-member team and I spent every weekend traveling to some of India's remotest regions, challenging entrenched norms and convincing hesitant parents to support their children's aspirations beyond generational jobs. By providing autonomy and linking each volunteer's skills to specific impacts, I nurtured my team's intrinsic motivation as they initiated teacher training programs and infrastructure partnerships with NGOs.

We transformed 10000+ change-seekers into change-makers developing waterbody-cleaning robots and cattle trackers. One student represented India at NASA, while many became entrepreneurs. During the pandemic, a former participant collaborated with me to adapt OpenTech online as Project Uplift, which earned United Nations recognition for community transformation. To me, leadership means building ecosystems that empower individuals and communities to unlock their potential.

Essay 3

Growth-Oriented: Curiosity can be seen in many ways. Please share an example of how you have demonstrated curiosity and how that has influenced your growth.

Response

During the pandemic, we transformed OpenTech into its online version which was recognized by the UN for cultivating leadership among students. However, I realized the sessions had become more about instructing than experiential learning. Seeking guidance from Plaksha (my postgrad) faculty, I restructured my approach by adding inquiry-based and peer-driven learning strategies. This led to the creation of ILGC, an eight-semester experiential program at Plaksha University. While ILGC delivered impactful in-person learning, it made me curious about how to make such experiences accessible globally.

This curiosity took root in my beginnings. Growing up in towns with limited opportunities, I hustled with online networking to broaden my horizons, eventually building a network of 20,000+ global leaders on LinkedIn. Leveraging this network, I discovered Elon Musk backed digital school, Synthesis, where I was invited to teach behavioral and game science. While Synthesis solved accessibility issues I faced earlier, its scalability challenges inspired me to co-found PeopleGamez. Here, we developed simulations that could reach 10x participants without compromising on quality.

Despite initial success, our simulations lacked the depth expected by executives, leading to bankruptcy. Forced to lay off my team and shut down our office, I worked from a board game cafe and volunteered with thought leaders, gaining practical insights into business challenges. These experiences helped me evolve our simulations from basic tools into business consultancy solutions that supported five ventures across three countries.

Curiosity has been my constant guiding force, driving me to continuously innovate to make impactful solutions accessible to all.

Post-MBA Goals

Industry Consulting - Management / Strategy

Function Consulting

Briefly tell us more about your career aspirations.

My long-term goal is to establish PeopleGamez in the US and scale globally empowering purpose-driven organizations with tech-infused solutions that drive sustainable growth. Post-MBA, I'll leverage my PeopleGamez background to become a strategy consultant at BCG-X or Oliver Wyman. Alternatively, I'll join enterprise firms like Grab or DoorDash in Strategy Planning. Both paths will enable me to return to PeopleGamez with the necessary skills to foster growth.

Additional Information

Please share additional information here if you need to clarify any information provided in the other sections of your application. This is not meant to be used as an additional essay. Please limit your additional information to the space in this section.

At Plaksha, I launched Madiie while managing coursework. A personal emergency of my co-founder required me to handle a critical project, leading to a failing grade in 'Persuasive-Presence-3' due to low attendance, despite a 4.0 GPA in prior 'Persuasive-Presence' courses.

At PeopleGamez, as one of two full-time employees supported by 8-15 freelancers, I reinvest profits to build assets and only take director remuneration in emergencies. Hence, my application lists a zero salary.

Additional Questions and Information

If admitted, are you willing to have information from your application released to alumni, staff and current students for contact purposes? ✓

Do we have your permission to send you text messages for communication purposes? ✓

Have you ever been the subject of disciplinary action (including, but not limited to, during military service or at place of employment)? Please do not include disciplinary action at academic institutions.

Have you ever been convicted of a felony (a crime with a punishment of more than one year in prison)?

Statement of Application Integrity

I hereby certify that the information presented in my application is accurate, complete, and honestly presented. I understand that it is my obligation to notify Harvard Business School immediately if there are any changes in the information I have provided in this application. I authorize all persons and entities herein named to provide information to Harvard Business School (HBS) or its agent to verify any aspect of my application and/or my credentials for admission. I understand HBS or its agent may take additional steps to fully consider all aspects of my candidacy. I understand and agree that any inaccurate information, misleading information, or omission will be cause for the rescission of any offer of admission, or for discipline, dismissal, or revocation of degree if discovered at a later date.

Offers of Admission: HBS Policy

- We review all submitted applications. It is your responsibility to ensure that we receive all of your application materials, including recommendations.
- You may apply in one round only once per application year.
- Admissions decisions are communicated to candidates online; admitted candidates also receive a PDF copy of the letter with a signature.
- Admissions decisions are communicated only to applicants.
- The MBA Admissions Office reserves the right to rescind offers of admission of any candidate between the time of admission and matriculation if we become aware of any conduct that we reasonably determine to be inconsistent with the HBS Community Values or MBA Program Honor Code.
- The MBA Admissions Board does not provide individualized feedback to candidates who are denied admission.

I have read the above statement of application integrity and HBS policy regarding offers of admission and, in submitting my application, accept these terms.

I ACKNOWLEDGE

Consent regarding Sensitive Personal Data

During the application process, you or others, such as recommenders, may provide Harvard Business School with certain kinds of personal data about you that some laws regard as sensitive and deserving of special protection ("Sensitive Personal Data"). For example, in Europe, Sensitive Personal Data can include personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership; genetic or biometric data; data concerning health; data concerning a natural person's sex life or sexual orientation; and personal data relating to criminal convictions and offences. You can find further information about how Harvard Business School uses personal data of individuals in Europe in the admissions process here.

Harvard is seeking your consent to process Sensitive Personal Data about you in order to evaluate your application for admission and your eligibility for financial aid, if applicable. Sensitive Personal Data about you also may be processed for other purposes permitted by applicable law. We need your consent in order to be able to process your application.

Offers of Admission: HBS Policy

I CONSENT TO THE PROCESSING OF MY SENSITIVE PERSONAL DATA, AS REQUESTED ABOVE.

Statement of Application Authenticity

I hereby certify that the information presented in my application is accurate, complete and honestly represented. In the spirit of the HBS Community Values, I have not claimed AI output nor the work of others as my own original work.

I ACKNOWLEDGE

Dharwad, India | (+91) 9495950729 | vikas@peoplegamez.com | linkedin.com/in/vikasbadami/

Experience

PeopleGamez.com

CEO, Co-Founder

Dharwad, India

Apr 2022 – Present

Strategy consulting firm with \$45K ARR catalyzing growth of purpose driven ventures with strategic realignment by leveraging gamification and data science. I lead a team of 8-15 freelancers and oversee strategy, business development, and client deliverables.

- Spearheaded the expansion of PeopleGamez simulations to 40,000+ learners globally by establishing strategic partnerships with trainers in 7 countries. Established competitive differentiation through localized distribution & tailored value proposition.
- Secured \$21K funding from two Central Government ministries for innovation, the only venture chosen among 36 at our incubator.
- Redesigned the company's operational model by establishing cross-functional workflows and data-driven performance tracking, creating a plug-and-play framework for freelancers. This reduced human dependency and cut operational costs by 50%.
- Recognized as a global thought leader in data driven simulations; Delivered sessions at multiple international conferences including ILYF Global Business Conclave (10000+ footfall), Gamicon48v, SeriousPlayConf (Canada), and AEE Conference (Singapore).

Representative projects

- Repositioned GrowthPal, a Singapore based M&A marketplace as an extended CFO team, establishing a recurring revenue model. Drove international expansion, boosting deal value by 6x, and reduced the sales cycle by 40% by pivoting to family-run ventures.
- Innovated a first-of-its-kind gamified tool to capture organizational needs and team energy for Juice Inc, a Canadian consultancy firm contributing to 35% of revenue and an increase in referral rate by 30%.
- Convinced US-based serial entrepreneur to pivot his fintech venture, Jugad, despite existing VC commitments, in favor of our alternative proposal detailing audience segmentation, competitive benchmarking and value proposition alignment.

MADIEE Games

COO, Co-Founder

Erode, India

Aug 2021 – Mar 2022

Corporate training consulting firm specialising in team development and organizational integration, leveraging simulations. I scaled the team from 2 to 118 members (mostly interns) designing 24 simulations, establishing workflows and growing operations.

- Nurtured a second line of leadership, spearheading strategic partnerships with government and private entities, scaling revenue 12x.
- Demonstrated business case and executed end-to-end executive development programs for Amazon, SHRM, Genpact, Dr. Reddy's, NTUC, etc. upskilling 800 executives on Business Acumen, Team Dynamics, Change management, etc.
- Persuaded MLAs and government stakeholders for gaming industry incentive policy through roundtables and one-on-one meetings leading to the implementation of a new policy (AVGC – XR Policy).
- Won Government of India's flagship Toycathon (129K participants) for our game based on MIT-JWEL's Human Skills Matrix.

Education

PLAKSHA UNIVERSITY | PGDM

Tech Leaders Fellowship, GPA: 3.49/4; (100% merit scholarship)

Gurgaon, India

Aug 2020 – Jul 2021

- Selected as a global venture catalyst delegate by UC Berkeley to create innovative AI-based solutions for enhancing operational efficiency in collaboration with 170 students from 30+ countries; Led "AI in Innovation" panel at the Harvard US-India Initiative.

NATIONAL INSTITUTE OF TECHNOLOGY, CALICUT | BTech

Production Engineering, GPA: 8.2/10;

Calicut, India

Jul 2016 – May 2020

- Youngest Global AI Scholar (Pi School of AI, Italy): Selected from 6,000+ candidates, earning a special 21st spot out of 20 for exceptional potential. Travelled to Italy to spearhead a solution for a problem worth \$270M for my sponsor, OctoTelematics.

Other

- Conceptualized 'Project Uplift', a top 3 Asian project by UPG, a UN wing, for leadership development in underprivileged students.
- Awarded Youth Icon by the Ministry of Youth Affairs, Government of India. Chosen as one of 40 national trainers to guide and mentor top entrepreneurs selected from 100000+ applicants across India, driving excellence and entrepreneurial growth.
- Top 1% selected among 15k+ social changemakers for 'Jagriti Yatra'. Mentored 'New Roshani Sanitary Pads', a startup incubated at 'Jagriti Enterprise Center', driving Sanitary Pad adoption by 5000+ rural women. Led volunteers for Kerala Floods (2018, 2019).
- Organized Ecoversity's (global community of un-schoolers) Re-imagining Education Conference, engaging stakeholders from 47 countries to explore transformative educational models

PLAKSHA TECH LEADERS FELLOWSHIP
OFFICIAL TRANSCRIPT

Plaksha Tech Leaders Fellowship (TLF) is a one year, fully residential, postgraduate program located in Gurugram, Haryana, India. It is co-designed and co-delivered by the Reimagining Higher Education Foundation in partnership with the Sutardja Center for Entrepreneurship and Technology at the University of California, Berkeley. The Reimagining Higher Education Foundation is a not-for-profit organization based in India and established by a group of academic and business leaders to reimagine technology education and research in India. The Fellowship aims to nurture leaders in technology who design ethical, scalable tech-centric solutions, are innovative and entrepreneurial, and drive impact.

TLF Curriculum

The Plaksha Tech Leaders Fellowship is delivered by 30+ high calibre visiting faculty from institutions such as UC Berkeley, Purdue University, University of Pennsylvania, University of Maryland, Tata Institute of Fundamental Research and many others. Practitioners from organizations such as Google and Microsoft Research are also a part of the faculty. The Fellowship spans across 8 academic terms of approximately 6 weeks each covering a total of 38 credits.

Entrepreneurial Challenge Lab -

The Entrepreneurial Challenge Lab is a mini-entrepreneurial journey spread across 8 weeks, aimed at simulating the environment of a start-up as part of the academic rigour. It is aimed at fostering business acumen while focusing on discovering or developing technology-related solutions.

Capstone Project -

The Capstone Project is an 8 weeks long, full time paid internship position that the fellows hold at a corporate organization or a research institution. Fellows are required to work on a pre-defined problem statement typically involving the application of technology to a real-world problem. Fellows can also work on a start-up idea, under the guidance and mentorship of industry leaders, as part of the Capstone Project.

Course descriptions are available at <https://plaksha.org/techleaders/program>.

Credits and Grading Policy

Each term's course load is 4-6 credits. Each credit is defined as 20 hours of classroom lecture time, with additional time for tutorials, office hours, field trips etc. Courses are divided into 3 categories: core, and elective

Core : The core courses are in Data Science, Machine Learning, AI and in Self and Leadership.

Elective : A student can choose to opt-in for an elective course based on their credit requirements to pass the program. These courses can be audited.

Earned Credits

A student earns the course credits when they receive a grade of 'D' or higher in a course.

Minimum Passing Credits

A student is required to earn a minimum of 34 credits in order to graduate from the program. Students receive a final letter grade for every course. These grades are calibrated to the GPA grade points. The grid below explains the relationship between the grades and their grade points.

Letter Grade	A	B	C	D	F
Grade Point	4.00	3.00	2.00	1.00	0.00

The program's grade point scale is A=4.0, B=3.0, C=2.0, D=1.0, F=0.0. Plus (+) or minus (-) may also be recorded. Grades with a plus sign (such as B+) carry 0.3 points more per unit; minus grades (such as A-) carry 0.3 points less.

Pass/Fail: Pass or Fail are assigned by the instructor and are based on fulfilling the criteria laid down by the instructor. A course taken on a Pass/Fail basis does not earn any credits.

Audit (AU): A successful completion of Audit is provided by the instructor and is based on fulfilling the criteria laid down by the instructor. A course taken on an audit basis does not earn any credits.

Withdrawn (W): In exceptional circumstances, a Fellow may be allowed to withdraw from a course. The 'W' grade does not carry any GPA points and fellows do not earn any credits for a course they are withdrawn from.

Non-contributory letter grades (Not contributing towards the CGPA)

S = Satisfactory; U = Unsatisfactory; W = Withdrawn; AU = Audit; R = Result Withheld/ Awaited

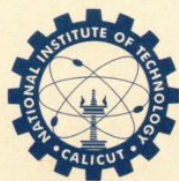

Grade Point Average

Each grade has a grade point associated with it (as detailed in the Table above). Only courses with letter grades A to F will contribute towards the calculation of CGPA, which is the weighted average of the grade points of all the earned credits.

No. A-2020-0859

राष्ट्रीय प्रौद्योगिकी संस्थान कलिकट
National Institute of Technology Calicut

Upon the recommendation of the Senate, hereby confers on

Vikas S Badami

the degree of

Bachelor of Technology

in

Production Engineering

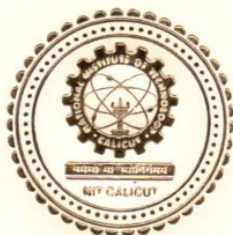

in the year 2020

and places him/her in

First Class with Distinction

Given at the National Institute of Technology Calicut

on November 28, 2020

CGPA (Cumulative Grade Point Average) = $\sum (C \times GP) / \sum C \rightarrow$ Summation is taken over all the courses registered for upto the final semester.

The CGPA Conversion to Percentage = (CGPA - 0.5) x 10

Pass/Fail courses are not included for computation of CGPA. * Credited by taking more than one chance

Attendance Code :

H - 90% and above
N - 80% and above, but less than 90%
L - Below 80%

CGPA 8 and above : First Class with Distinction
CGPA 6.5 and above, but less than 8 : First Class
CGPA 5 and above, but less than 6.5 : Second Class
